

Providing high school horticulture teachers with the tools to prepare their students for FNGLA's Certified Horticulture Professional (FCHP) exam.

Welcome to TeachHort.com

TeachHort.com is FNGLA's newest venture – providing high school horticulture teachers with the tools to prepare their students for [FNGLA's Certified Horticulture Professional \(FCHP\) exam](#).

FNGLA has secured a grant from the U. S. Department of Agriculture to create this curriculum program that will not only assist teachers, but will introduce more of tomorrow's future leaders to our industry.

The Florida Career and Professional Education (CAPE) Act was enacted into law in 2007. It requires public high schools to offer "rigorous and relevant" curriculum that leads to industry recognized certifications. Workforce Florida, Inc. and the Florida Department of Education have recognized the FCHP program as the horticulture certification that will comply with CAPE for Environmental Horticulture Science & Services.

For more information on purchasing a subscription to TeachHort.com, contact [Merry Mott](#) at FNGLA.

TeachHort.com launches in August 2009

TeachHort.com will launch in August 2009, just in time for the school year.

The program will provide:

- Lesson Plans
- Labs & Bell-ringers
- Plant Photo Library
- Connection to FFA Career Development Events
- FCAT Connections
- Pre- and Post-tests

TeachHort.com is a curriculum assistance program brought to you by the Florida Nursery, Growers and Landscape Association. It is intended to supplement Florida's horticulture teachers' current curriculum within the Environmental Science and Services frameworks.

Targeting Introductory Horticulture 2 & Horticultural Science 3 (grades 10 -12) the lessons included in TeachHort.com are aligned with the material covered in the FNGLA Certified Horticulture Professional (FCHP) Certification Manual and are designed to integrate into your current Horticulture Curriculum.

In addition to providing guidance in preparing your students for horticulture certification through FNGLA, TeachHort.com also makes the connection to industry best management practices, Sunshine State Standards, and FFA's Career Development Events for Floriculture and Nursery & Landscape.
